

Our 2022 impact

measuring pact's mission
2022

At Pact, we believe in the power of evidence-based decision-making to achieve sustainable social impact. We strive to use continual learning to improve our programming. High quality and timely data provide the foundation that makes this possible.

As we have done for the past 12 years, we are proud to share the impact of our work for the 2022 fiscal year, from October 2021 to September 2022. This includes results from our global indicators in the areas of health, livelihoods, the environment, capacity development, governance, mining and energy. We also share our results by location, representing nearly 100 projects across the world, including in new geographies across Latin America and the Caribbean, north and west Africa, and Asia.

Behind every data point that follows is a person, a community, a life. We are committed to transforming lives in ways that are lasting and measurable. This requires a commitment to being evidence-driven, that is, dedicated to generating, utilizing and sharing evidence to make timely decisions and learn to improve. At the same time, we never lose sight that the purpose of data and evidence is to ensure that what we are doing is valid and implemented in a manner that is transformative.

Each year, millions of people in communities around the world meaningfully improve their lives through our programs. Our work helps communities gain knowledge, skills and resources to combat disease, gain electricity, build peace and democracy, fight poverty through entrepreneurship, protect local natural resources, adapt to climate change, stop child labor and human rights abuses and more.

As we continue to support engaged communities around the globe, data and evidence will play a critical role in our work and decision-making.

For more information about our methodology, contact our Learning, Evidence and Impact team, leap@pactworld.org.

our 2022 impact

 **health** We support vulnerable people to access the health and social services they need to enjoy a healthy life.
1,294,188 people with improved access to health and social services

 **livelihoods** We empower people with limited livelihood choices to gain the resources they need to become income-secure.
1,467,867 people with increased net income and savings

 **environment** We partner with resource-dependent communities to help them gain lasting benefit from the sustainable use of the natural resources around them.
2,700,256 people benefiting from improved natural resource management

 **capacity development** We help systems, organizations and individuals learn, adapt and create sustainable development outcomes.
883 partner organizations with improved performance

 **governance** We support an enabling environment that fosters inclusive, transparent and accountable governance.
6,274,382 citizens participating in initiatives that resulted in positive civic and state-society engagement

 **responsible mining** We tap into the power of markets as a positive force for development.
84,243 people served by mining projects

 **energy** We work toward a future where all people can enjoy the benefits of modern energy.
98,474 people with increased access to energy

health

Achieving good health and well-being requires healthy behaviors and quality services that reach all ages. Pact is at the forefront of expanding the role of communities and civil society in working to improve person-centered health and social services with government agencies and private and faith-based service providers. We work with national and local partners to improve inclusive and equitable access to services that deliver what communities need from strengthened public health systems. Our sustainable, community-led HIV and other health programming responds to the prevention and care needs of vulnerable children, youth, pregnant and breastfeeding women, caregivers and families, and marginalized groups. Together with our local partners, we develop their capacity to address barriers that sideline these at-risk populations. Community-based solutions for better health - integrated with livelihoods and good governance approaches - facilitate local response and resilience to shocks and stresses such as war, conflict and the Covid-19 pandemic.

We helped connect nearly **1.3 million people** with health and social services, and we strengthened more than **100 health and social systems.**

STRENGTHENED HEALTH AND SOCIAL SYSTEMS

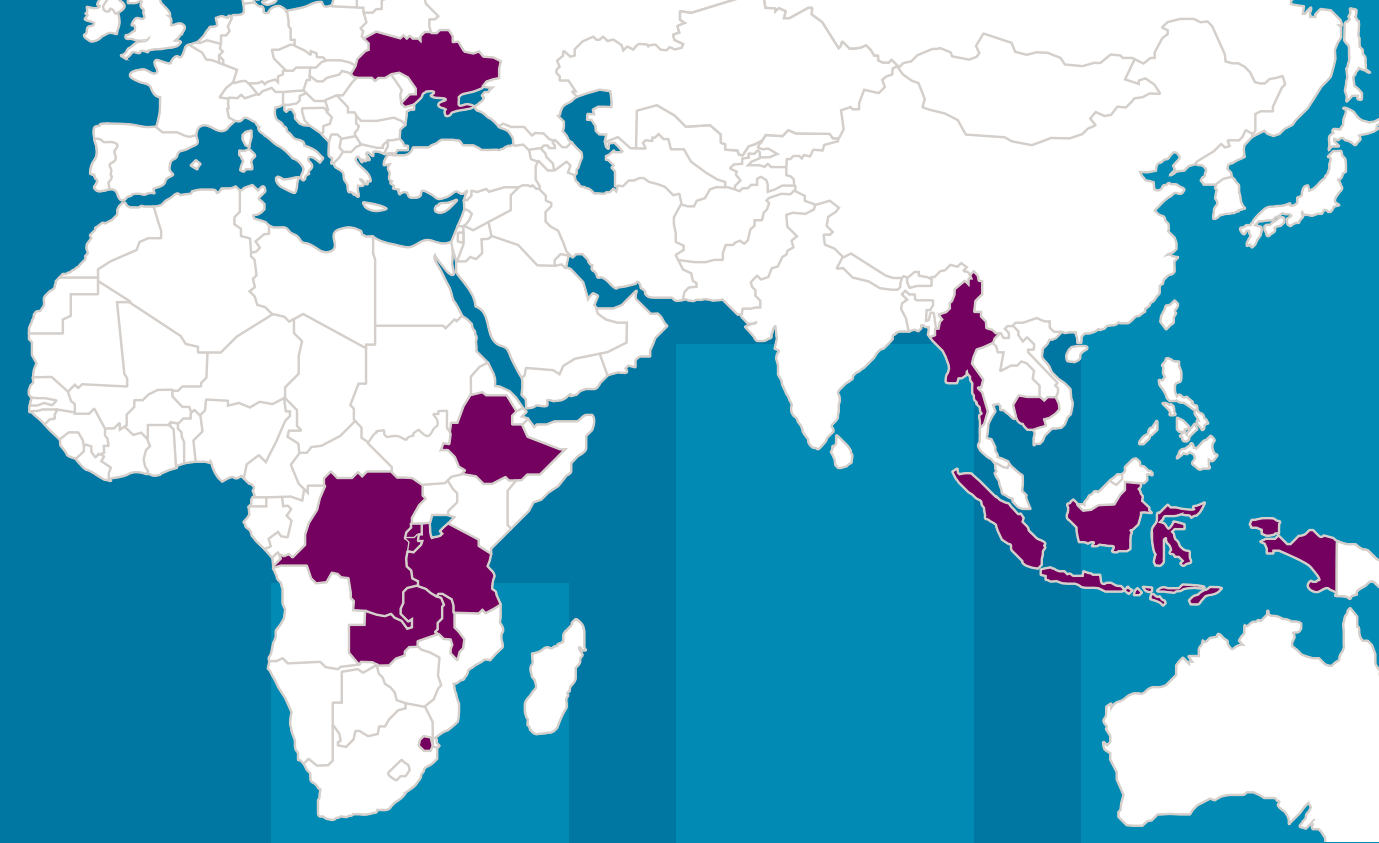

livelihoods

Economic resilience and empowerment are at the core of people's ability to own their future, especially for women, youth and disadvantaged groups who tend to be most excluded from traditional market systems. Pact works hand in hand with the communities we serve to promote access to finance, support micro and small enterprise development, and realize labor rights. By enhancing access to livelihoods knowledge, skills and resources at the community level and engaging with governments, private-sector actors and local organizations to create economic opportunity, we support the development of sustainable, resilient and inclusive livelihoods.

With Pact's support, more than **1.4 million people** raised their income and nearly **9,000 groups** improved their financial situation.

GROUPS WITH INCREASED ASSETS

environment

To make lasting positive change for the next generation, communities must have the skills, resources and opportunities to responsibly safeguard while benefitting from the natural resources around them, from fish to forests to agricultural products, and to adapt to climate change. In partnership with local communities, governments, local organizations and the private sector, we foster sustainability in agriculture and forestry supply chains; strengthen local capacity and effective community-based natural resource management governance systems; and help people develop alternative and sustainable climate-resilient, nature-based enterprises.

Myanmar	70
Thailand	272,426

More than **2.7 million people** benefited from improved natural resource management because of Pact, and nearly **7.4 million hectares** were brought under improved management.

capacity development

To be sustainable, communities and systems must become self-reliant. Pact views capacity development as an asset-based, inclusive process, approach and outcome. Capacity development must be intentional, go beyond knowledge and skills transfer, rely on co-creation and co-implementation, incorporate innovative technologies in creative ways and agilely work within complex, adaptive systems. Pact is committed to the further localization of development. Our capacity development work is holistic and intersects all of our programming to best meet the needs of local actors, ensuring their leadership of the process.

With Pact support, **883 partners** (local organizations, government agencies, networks and community committees) measurably* improved their performance. Overall, we supported **1,127 partners** to deliver impactful and effective development impact.

*Pact measures improvement in performance by using an approved performance metric that requires an increased score in the reporting year; partners with a single score are reported as supported.

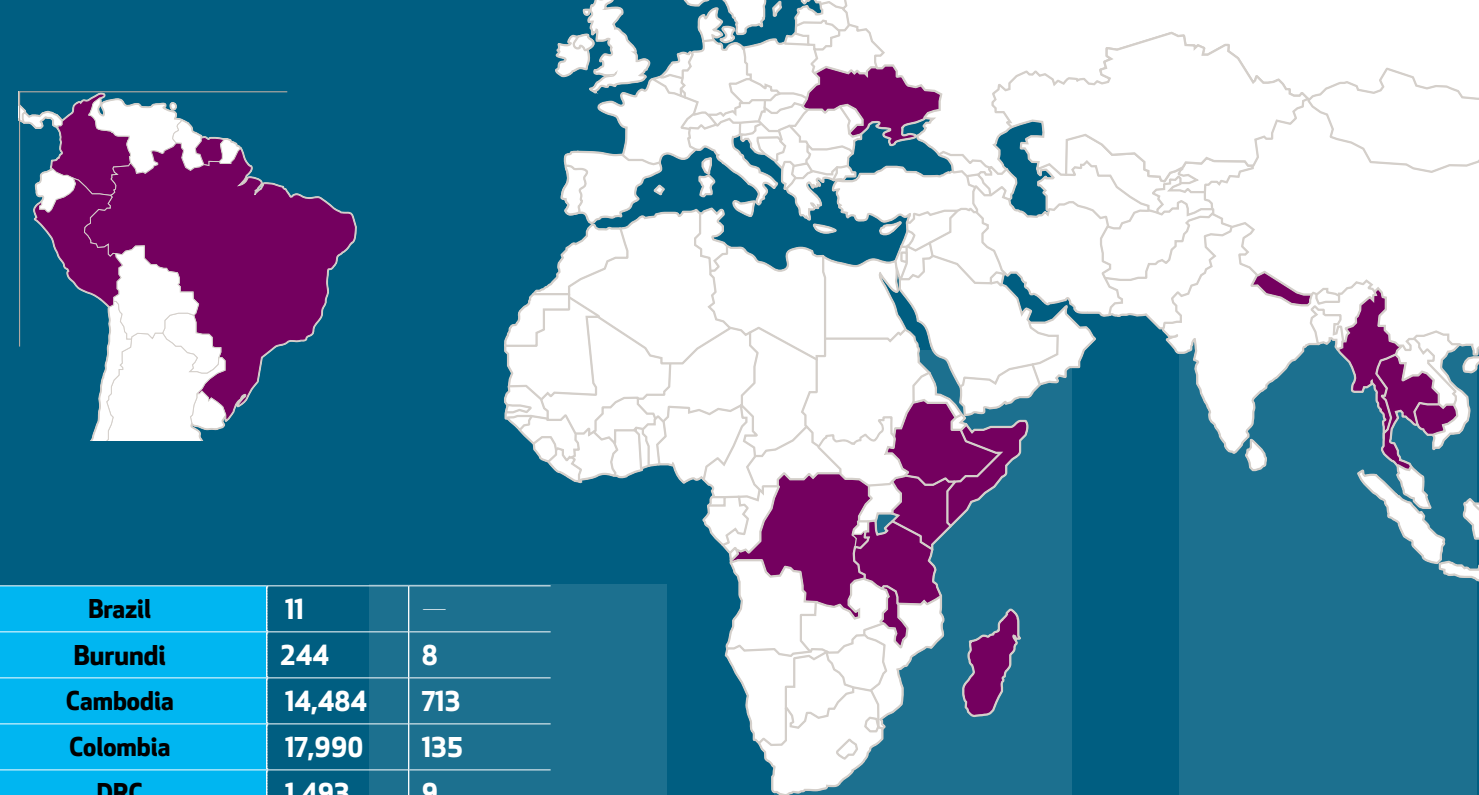

governance

Effective, responsive and inclusive governance systems are fundamental building blocks to local development. Pact partners with civil society, media and governments to protect and expand civic space and broaden participation in local decision making. We work with peace activists to strengthen local institutions for fostering stability and positive social dialogue to address intra- and inter-communal conflict, including across national borders. We strengthen diverse networks of civic and social actors—including community groups, national civil society organizations, private sector and government agencies—to advance policies and collective action that positively impact local communities. This includes supporting marginalized communities such as youth, women, ethnic and religious minorities, indigenous peoples and migrant communities to demand accountability and claim basic rights.

Our governance programming enabled more than **6 million citizens** to take part in more than **2,000 initiatives** that resulted in positive civic and state-society engagement.

responsible mining

Using markets as a positive force for development means communities have the systems and opportunities they need to achieve the change they desire. Pact’s mining program brings together government, industry and miners – women and men – to make artisanal and small-scale mining (ASM) safer, formalized, more productive and resilient, and to address challenges such as child labor in mining. Pact’s efforts are helping to reveal and make the most of ASM’s contributions to development in communities around the globe and deliver a just, green energy transition built on responsible mining practices and mineral sourcing.

Pact projects leveraged business and markets as a force for positive change and helped improve the lives of more than **84,000** artisanal and small-scale miners.

PEOPLE SERVED BY MINING PROJECTS

energy

Energy is an essential resource for all people. Without access to reliable, sustainable and affordable sources of clean energy, starting or growing a business, delivering modern health care, or enjoying basic needs such as lighting are out of reach for more than one billion people. Pact collaborates with governments, companies, investors and civil society organizations to connect supply and demand for, and remove market distortions to, renewable energy. We work toward a future where all people can enjoy the benefits of modern energy while mitigating the impacts of climate change.

With Pact's support, more than **98,000** people increased their access to energy and/or increased their means to use it productively.

our impact, by location

BANGLADESH

Pact works in Bangladesh to improve maternal, newborn and child health, family planning and reproductive health by strengthening the capacity of local organizations to provide critical health services.

- 2 PARTNER ORGANIZATIONS WERE SUPPORTED.
- 9 INDIVIDUALS WERE DIRECTLY SERVED AND 3 INDIVIDUALS WERE TRAINED.

BELARUS

Pact works in Belarus to grow civic education and engagement, increase the accessibility of objective information through support to independent media, and promote human rights and democracy.

- 6 PARTNER ORGANIZATIONS WERE SUPPORTED.
- 13,974 INDIVIDUALS WERE DIRECTLY SERVED AND 391 INDIVIDUALS WERE TRAINED.

BRAZIL

In Brazil, Pact increases Indigenous people's influence in governance to protect the environment and rights of Indigenous people by building the capacities of indigenous organizations to access and manage financial resources and direct their own development planning and priorities. We also reduce the negative impacts of economic development on forests and water resources.

- 4 PARTNER ORGANIZATIONS WERE SUPPORTED.
- 11 CITIZENS PARTICIPATED IN CIVIC AND STATE-SOCIETY ENGAGEMENT.
- 11 INDIVIDUALS WERE DIRECTLY SERVED AND 11 INDIVIDUALS WERE TRAINED.

BURUNDI

In Burundi, Pact provides capacity development to local partners supporting orphans and vulnerable children and working on prevention of HIV and gender-based violence. Pact also assists communities to gain lasting benefits from the more sustainable use of natural resources thereby contributing to the economic and environmentally sustainable growth of Burundi's mining sector.

- 4,416 PEOPLE INCREASED THEIR NET INCOME.
- 2 PARTNER ORGANIZATIONS WERE SUPPORTED.
- 3,776 INDIVIDUALS WERE SERVED BY MINING PROJECTS.
- 4,567 INDIVIDUALS WERE DIRECTLY SERVED AND 3,940 INDIVIDUALS WERE TRAINED.

CAMBODIA

For 30 years, Pact has been implementing an integrated approach to improve lives in Cambodia, bridging gaps between sectors so communities can respond to their development challenges holistically.

- 141 PEOPLE INCREASED THEIR NET INCOME.
- 58 PARTNER ORGANIZATIONS WERE SUPPORTED.
- 14,484 CITIZENS PARTICIPATED IN 713 INITIATIVES RESULTING IN POSITIVE CIVIC AND STATE-SOCIETY ENGAGEMENT.
- 185,812 INDIVIDUALS WERE DIRECTLY SERVED AND 4,909 INDIVIDUALS WERE TRAINED.

COLOMBIA

In Colombia, Pact works with civil society, institutions and the private sector to reduce child labor and improve working conditions in gold mining as well as cut flower and unrefined sugar sectors. Pact also supports conservation efforts in the Amazon through partnerships with indigenous peoples' organizations and addresses the Venezuelan migration crisis by focusing on citizen security and social cohesion.

- 4 HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.
- 48 PARTNER ORGANIZATIONS WERE SUPPORTED.
- 17,990 CITIZENS PARTICIPATED IN 135 INITIATIVES RESULTING IN POSITIVE CIVIC AND STATE-SOCIETY ENGAGEMENT.
- 19,765 INDIVIDUALS WERE DIRECTLY SERVED AND 6,831 INDIVIDUALS WERE TRAINED.

Descriptions are current for the 2022 fiscal year, from October 2021 to September 2022

CÔTE D'IVOIRE

In Côte d'Ivoire, Pact is strengthening organizational and technical capacity of local organizations to expand access to reproductive health services. This includes increasing accessibility, availability and use of a range of modern contraceptive methods, and uptake of maternal and newborn services at the primary health care level in selected districts.

- 👥 **19** PARTNER ORGANIZATIONS WERE SUPPORTED.
- 👤 **204** INDIVIDUALS WERE DIRECTLY SERVED AND **59** INDIVIDUALS WERE TRAINED.

DEMOCRATIC REPUBLIC OF THE CONGO

In Democratic Republic of the Congo, Pact assists communities to gain lasting benefits from the more sustainable use of natural resources and reduce conflict by strengthening conflict mitigation mechanisms and resolution processes for peacebuilding. Pact takes an integrated approach to its work, linking mining, livelihoods, governance, health and environment.

- 👤 **4,547** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES.

VIETNAM

In Vietnam, Pact works to catalyze private-sector finance to upscale and drive investments in agriculture, forestry and other land use toward low-emission, yet profitable business models. We also support Vietnam to achieve sustainable landscape-related climate mitigation goals as submitted to the United Nations Framework Convention on Climate Change.

-  **17** PARTNER ORGANIZATIONS WERE SUPPORTED.

ZAMBIA

With a focus on high-risk groups, Pact is helping Zambia to reduce new HIV infections by increasing HIV awareness and the use of HIV services, and by building the capacity of local organizations to deliver high-quality programs.

-  **142,613** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES, AND **6** HEALTH AND SOCIAL SERVICE SYSTEMS WERE STRENGTHENED.
-  **47,903** PEOPLE INCREASED THEIR NET INCOME, AND **2,088** SAVINGS AND MICROFINANCE GROUPS INCREASED THEIR FUNDS.
-  **13** PARTNER ORGANIZATIONS WERE SUPPORTED.
- 149,479** INDIVIDUALS WERE DIRECTLY SERVED AND **1,919** INDIVIDUALS WERE TRAINED.

Pact is an international nonprofit that works in nearly 40 countries building solutions for human development that are evidence-based, data-driven and owned by the communities we serve. Founded in 1971, Pact works with partners to build resilience, improve accountability, and strengthen knowledge and skills for sustainable social impact.
