

Heard.
Capable.
Vibrant.

MEASURING PACT'S MISSION
2017

OUR PROMISE

Our work must transform lives, communities and systems in ways that are lasting and *measurable*.

ABOUT PACT

Pact is the promise of a better tomorrow for communities challenged by poverty and marginalization. We serve these communities because we envision a world where everyone owns their future. To do this, we build systemic solutions in partnership with local organizations, businesses and governments that create sustainable and resilient communities where those we serve are heard, capable and vibrant. On the ground in countries around the world, Pact's integrated, adaptive approach is shaping the future of international development.

Heard. Capable. Vibrant.

Our vision is built on these words, and we believe all communities deserve to embody them. When people are heard, they are aware of and express their needs and rights in a receptive system. When they are capable, they have skills and resources and apply them. When they are vibrant, they are healthy and prosperous.

In 2017, we worked in partnership with communities across the globe to help them own their futures. The change we've seen – in healthier mothers and children in Nigeria, in thriving local NGOs in Ukraine, in self-reliant, resilient villages in Myanmar – tells us we are making progress together. But our progress must be measurable, too. It must be backed by data. This is why, seven years ago, we began measuring and reporting our results with standardized indicators.

The numbers that follow represent the breadth of our programming, which includes 84 projects implemented in the 2017 fiscal year, from October 2016 to September 2017. During that time, Pact had staff based in 25 countries, and we collaborated with partners in nine others. We use a set of 12 global indicators that reflect our results in six areas – health, livelihoods, natural resource management, capacity development, governance and business and markets. However, because we use an integrated approach in our programming, most of our work spans more than one sector.

Pact is committed to sharing our data publicly, and to measurement that is rigorous. A handbook that defines our indicators and describes our methodology is available upon request, and our website, pactworld.org, offers interactive visualizations of our data, including historical numbers.

For more information, contact our results and measurement team, rm@pactworld.org.

HEALTH

Vulnerable people access the care they need to enjoy a healthy life.

2,971,710

People with improved access to health and social services

LIVELIHOODS

People with limited livelihood choices gain the resources and access they need to become income-secure.

GOVERNANCE

Inclusive, transparent and effective governance enables people to be active members of society.

201,115

Citizens participating in initiatives that resulted in positive state-society engagement

BUSINESS AND MARKETS

Markets act as a galvanizing force for local development.

17

Projects where businesses and markets are a force for positive change

HEALTH

Health is critical to living vibrantly.

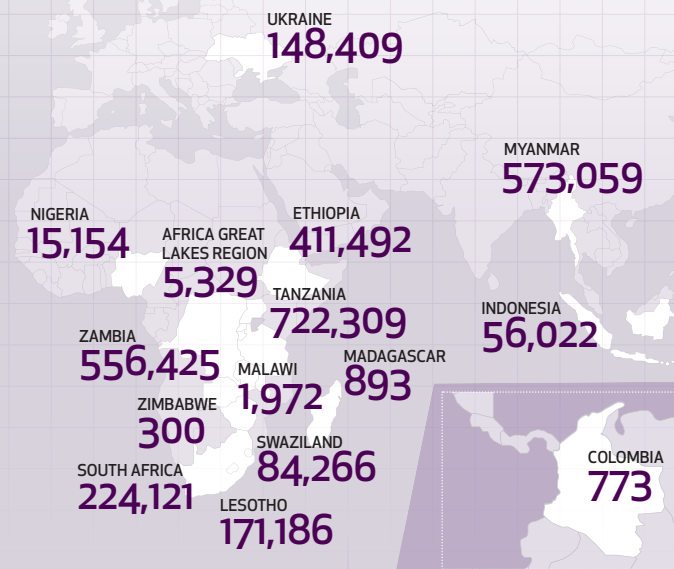

Working in partnership with communities, governments and local nonprofits and care providers, we improve health and social systems around the world, especially those that serve marginalized populations. This means lasting access to services. Our health programming focuses on HIV and AIDS, maternal and child health, orphans and vulnerable children and more.

In 2017, 33 of our projects touched on health. In all, we helped connect nearly 3 million people to health and social services, and we strengthened more than 1,700 health and social systems.

Through the Shae Thot project in Myanmar, Pact has dramatically improved health for mothers and children in rural villages.

LIVELIHOODS AND ECONOMIC DEVELOPMENT

Economic empowerment

is at the core of people's ability to be capable and to thrive, especially for women. Around the world, through our WORTH model and other programming, we help communities gain the skills and resources they need to earn dignified livings, from training in entrepreneurship to access to affordable credit.

We helped more than 1 million people across Africa and Asia raise their income in 2017 – more than 95 percent of them women.

Around the world, WORTH members lift themselves out of poverty through economic empowerment, literacy and skills training.

NATURAL RESOURCE MANAGEMENT

To be vibrant,

communities must responsibly benefit from the natural resources around them, including forests, water, cropland and mineral deposits. In partnership with governments and local organizations, we strengthen local capacity, build effective resource management systems and help people develop sustainable nature-based enterprises.

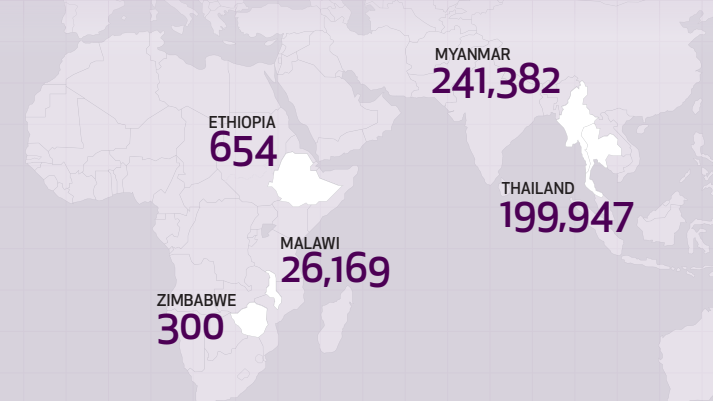

In 2017, more than 460,000 people benefited from improved natural resource management because of Pact, and nearly 300,000 hectares were brought under improved management. The vast majority was in Malawi, where the introduction of fish sanctuaries and no-fishing seasons has helped fish stocks rebound.

In Malawi, Pact's Fisheries Integration of Society and Habitats project, or FISH, increases social, ecological and economic resilience to climate change, and improves biodiversity conservation.

CAPACITY DEVELOPMENT

Local Strength

From Ukrainian nonprofits that serve people living with HIV to peace and security institutions in Africa, we help organizations broaden and deepen their capacity. Using a systems-based approach and Pact's suite of capacity development tools, we mentor our partners to more effectively, equitably and sustainably serve their communities. After USAID's 2016 endorsement of Pact's Organizational Performance Index, use of the tool continues to grow within and outside of Pact.

In 2017, we helped more than 1,300 local organizations, networks, government agencies and community committees strengthen their capacity. Sixty four of our 84 projects included capacity development.

Pact's RESPOND project in Ukraine built the capacity of local organizations working to treat and prevent HIV.

GOVERNANCE

To help people be heard,

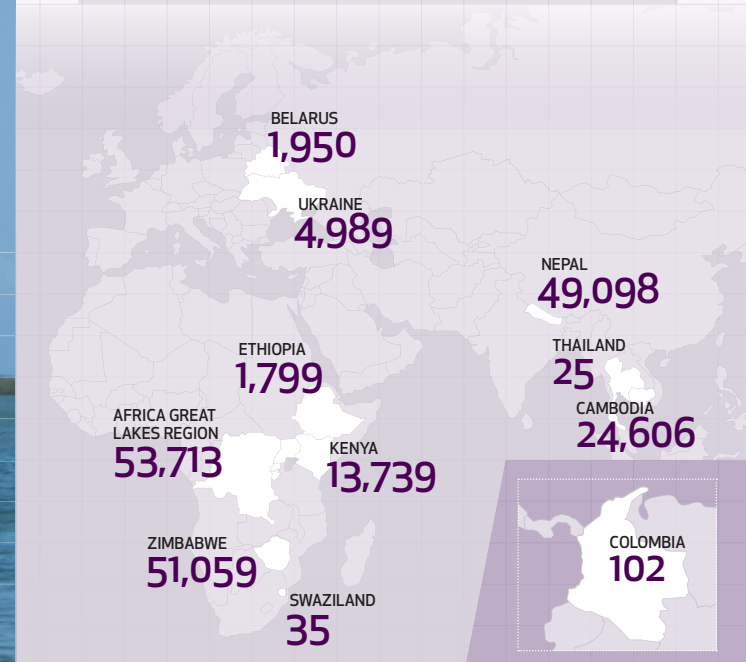

we foster national, regional and local governance that is inclusive, transparent and accountable, and government institutions that respond to citizens' needs, deliver quality services and effectively manage public resources. We help build cooperation among governments, communities, civil society and business.

In 2017, our governance programming enabled more than 200,000 citizens to take part in more than 3,500 initiatives that resulted in positive state-society engagement and 22 policy changes. Our governance approaches were applied in 29 projects across the world, often in politically closed or semi-closed environments.

Pact's PEACE III project works along Kenya's borders to strengthen conflict-management systems and build the capacity of regional and national institutions to stem cross-border conflict.

BUSINESS AND MARKETS

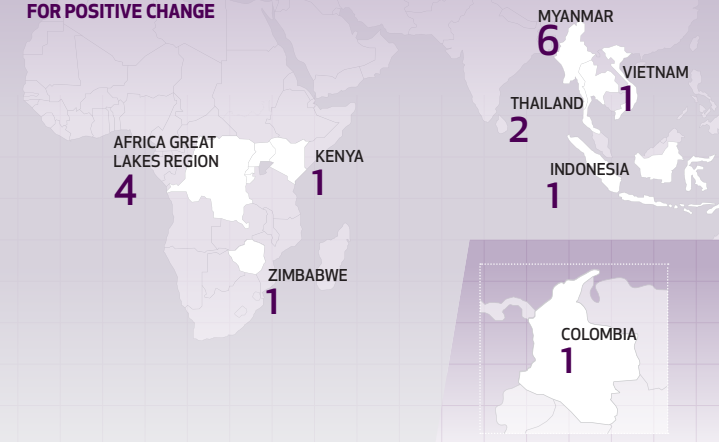

Across the world,

Pact strengthens local economies by using markets as a force for development, because to own their future, communities must be prosperous. Our signature Mines to Markets program, which continues to grow, works in partnership with artisanal miners, governments and industry to make the sector safer, non-exploitative, and more sustainable, lucrative and formalized.

In 17 of our projects, from Africa to Asia to South America, we leveraged markets as a force for positive change. We helped improve the lives of more than 70,000 small-scale miners.

The Zimbabwe Accountability and Artisanal Mining program increases cooperation between small-scale and industrial miners and formalizes the production and trade of gold by the country's estimated 500,000 artisanal miners.

Pact's integrated approach

Poverty and marginalization don't have a single cause or a single solution. That's why Pact uses an integrated approach to development – one that recognizes the complexity of people's lives and focuses on systemic, lasting change. By intentionally linking disciplines and sectors, we amplify our impact, increase sustainability and address development challenges more effectively.

In 2017, 56 of our 84 projects - 66 percent - spanned two or more of the six sectors in which Pact specializes. Thirty one of these projects spanned three or more sectors, with some spanning even more.

INTEGRATION IN MYANMAR

Pact's Shae Thot project – “The Way Forward” – includes interventions in all six of the sectors in which Pact works, and in several more with the help of our partners. Since 2011, Shae Thot has worked in more than 2,800 rural villages across Myanmar, supporting community-based committees to implement health, water, nutrition, agriculture, food security and livelihoods and economic strengthening activities in their communities.

An independent assessment of integration in Shae Thot concluded that “the integrated approach had been

effective in achieving planned program outcomes and in many cases exceeding program expectations. This was most likely to occur when three or more program components mutually reinforced each other and consequently outcome efficiencies and effectiveness were strongest.” Researchers used the term *integration accelerator* to describe what they found, writing, “The combined synergies ... gave rise to what could be regarded as a micro-economy. In the context of an integrated approach, it was referred to as the *integration accelerator*: access to credit services, access to resources, and training to develop knowledge and skills.”

INTEGRATION AND IMPACT, BY COUNTRY

AFRICA GREAT LAKES REGION

In the Democratic Republic of Congo, Rwanda, Burundi and Uganda, Pact assists resource-dependent communities in gaining lasting benefits from the more sustainable use of the natural resources around them. Pact takes an integrated approach to its work in the mining sector, linking mining to livelihoods, governance, health, environment, and the strengthening of local, regional and national institutions.

 **5,329** PEOPLE HAD IMPROVED ACCESS TO HEALTH AND SOCIAL SERVICES, AND **9** HEALTH SYSTEMS WERE STRENGTHENED.
